Ryland Liu

Frontend Engineer

(+65) 81309716 · saintleso@gmail.com · www.linkedin.com/in/ryland-liu · github.com/L-Ryland

Frontend engineer building accessible, internationalized React applications with scalable microfrontend architectures.

TECHNICAL EXPERTISE

Frontend	React.js, TypeScript, Next.js, Vue.js, Vite, Module Federation
Engineering	a11y, i18n, automated testing, RBAC, CI/CD, cross-functional collaboration

CERTIFICATES

Google UX Design Professional Certificate Nov 2024

Computer and Software Technology Qualification (Software Design Engineer) Nov 2021

RHCE/RHCSA **Server Operations** Jun 2021 - April 2027

ENTERPRISE EXPERIENCES

Gronova - Co-Founder September 2024 - February 2025

- Co-founded a job-matching startup connecting overseas graduates with local businesses.
- Designed React/Next.js frontend architecture, led platform development, and reviewed code for 10+ contributors.

EDUCATIONAL BACKGROUND

University of Suffolk · Msc International Business and Management 2024.01 - 2025.01

PROFESSIONAL EXPERIENCES

DBS Tech December 2025 - Until now

Frontend Engineer China - Full time

- Developed React.js applications within a Module Federation microfrontend architecture.
- Collaborated cross-functionally to deliver features, unit tests, and code reviews for reliable releases.

Empact Pte Ltd (Singapore) January 2025 - October 2025

Tech Consultant Remote - Part time

- Built reusable Python, XML, and JavaScript snippets for internal systems, improving development efficiency.
- Provided technical support and implemented semantic HTML for accessibility and SEO.

PacPort (Japan) July 2022 - June 2024

Frontend Engineer Remote - Fulltime

- Led platform architecture and UI optimization, improving load speed 30% and conversion 15%.
- Standardized CI/CD to cut post-deployment issues 40%; optimized caching and indexing to reduce API/database response times 20%.
- Built scalable backend services handling 500+ requests with 99.95% uptime.

State Grid Corporation of China (SGCC) October 2019 - December 2021

Associate IT Engineer Zhejiang, China - Fulltime

- Maintained 99.99% system uptime supporting uninterrupted power supply for 1.1B+ users.
- Automated 70% of routine operations with Python/Bash, saving 15+ hours/month and reducing network downtime 10%.
- Built 8+ Python/Java modules and optimized SQL, reducing report generation time 35%.

PROJECT EXPERIENCES

Sail Nudges (for DBS)

- Developed a nudge management platform using React.js and Module Federation microfrontends.
- Delivered accessible, responsive, internationalized interfaces with RBAC and 90% automated test coverage.

Offerlah Website (for Gronova) September 2024 - February 2025

- Built and launched a Next.js platform from concept to production using SSR/SSG, image optimization, and code splitting.
- Established a reusable component library in collaboration with the design team.

Pabbit Desk (for PacPort) November 2023 - June 2024

- Built a React.js + Go (Gin) property/IoT management system supporting 500+ devices.
- Created a mobile dashboard reducing task time 40%, integrated AWS Cognito for 2K+ monthly users, and improved API speed 35%.

MC2 (for MC2 Finance) July 2022-Jan 2023

- Built real-time Vue 3/WebSocket visualization and trading interfaces processing 10K+ AI images/hour with 95% data accuracy.
- Reduced data latency 40% through adapter optimization and API calls 35% with VueQuery.
