Ryland Liu

Frontend Engineer

(+86) 185-0680-0365 · saintleso@gmail.com · www.linkedin.com/in/ryland-liu · github.com/L-Ryland

Passionate about **Web3**, **LLMs** (Large Language Models), data science, and emerging technology trends, and believes in the power of coding to change lives and drive business innovation.

TECHNICAL EXPERTISE

OS	Linux MacOS Windows
Frontend	React.js, TypeScript, Next.js, Vue.js, Vite
Soft Skills	Excellent communication and listening skills, Team collaboration

CERTIFICATES

Google UX Design Professional Certificate Nov 2024

Computer and Software Technology Qualification (Software Design Engineer) Nov 2021

RHCE/RHCSA **Server Operations** Jun 2021 - April 2027

ENTERPRISE EXPERIENCES

Gronova - Co-Founder September 2024 - February 2025

A startup company that bridges the gap between overseas fresh graduates and local businesses by providing precise job matching and addressing information asymmetry.

- Designed frontend architecture with React.js and Next.js, ensuring a smooth user experience.
- Led the frontend development of the job matching platform, code review for 10+ team members, ensuring high-quality code.

PROFESSIONAL EXPERIENCES

Empact Pte Ltd (Singapore) January 2025 - until now

Tech Consultant Remote - Part time

- Developed and maintained scalable snippets for internal system using Python, xml and JavaScript, improving code reusability and efficiency.
- Provided technical support and solutions, leveraged semantic html markup, ensuring accessibility and optimization for SEO.

PacPort (Japan) July 2022 - June 2024

Frontend Engineer Remote - Fulltime

- Led platform architecture design, boosting UI load speed by 30% (measured via Lighthouse).
- Cut post-deployment issues by 40% by standardizing CI/CD pipelines (tracked via JIRA logs).
- Improved conversion rates by 15% through UI optimizations like lazy loading (A/B tested).
- Reduced API/database response times by 20% with caching and indexing.
- Built scalable backend services handling 500+ requests (99.95% uptime via load tests).

State Grid Corporation of China (SGCC) October 2019 - December 2021

Associate IT Engineer Zhejiang, China - Fulltime

- Achieved 99.99% system uptime (5-year peak) by resolving hardware/software issues, ensuring uninterrupted power supply for 1.1B+ users.
- Reduced network downtime by 10% via traffic analysis and configuration tuning.
- Automated 70% of routine tasks (e.g., alerts, log cleanup) with Python/Bash, saving 15+ hours/month.
- Optimized SQL queries to slash report generation time by 35% (12s ⟶7.8s).
- Built 8+ backend modules (Python/Java), boosting data processing speed by 25%.

PROJECT EXPERIENCES

Offerlah Website (for Gronova) September 2024 - February 2025

- Drove platform development from concept to launch (0⟶1) using Next.js
- Built core architecture with SSR/SSG for enhanced SEO and performance
- Implemented image optimization and code splitting features
- Established component library with design team collaboration
- Tech: Next.js, React, TypeScript

Pabbit Desk (for PacPort) November 2023 - June 2024

- Built property/IoT management system using React.js + Go (Gin) for 500+ devices
- Created mobile-optimized dashboard cutting user task time by 40%
- Integrated AWS Cognito for 2K+ monthly users
- Improved API speeds by 35% through backend optimization
- Tech: React, Go, AWS, PostgreSQL

MC2 (for MC2 Finance) July 2022-Jan 2023

- Created real-time data visualization system handling 10K+ AI-generated images/hour
- Built trading interface with Vue 3/WebSocket integration achieving 95% data accuracy
- Reduced data processing latency by 40% through optimized adapter layer design
- Cut API calls by 35% via VueQuery state management implementation
- Tech: Vue 3, WebSocket, LLM integration

EDUCATIONAL BACKGROUND

2024.01 – 2025.01 **University of Suffolk** · Msc International Business and Management

Developed problem-solving and analytical skills through data-driven business strategy projects, leveraging tools like Excel and SQL for market analysis. Collaborated in cross-functional teams to design and present scalable solutions for case studies, demonstrating agile project management and technical communication skills.

INTERNSHIP EXPERIENCES

Empact - Software Engineer July 2024 - January 2025

As a professional under supervision, I was responsible for developing implementing prototype designs, developing code, maintaining Python scripts, and providing various IT support services.
